

Eve Silver is Executive Director of CLResearch.

Her work provides support for translational research goals in the basic sciences. She is a science editor and a member of the American Medical Writers Association. Ms. Silver lectures widely at universities and institutions internationally with a focus on the cancer information disparity addressing the Abortion-Breast Cancer Link.

She has partnered with the Army Medical Research and Materiel Command, The Department of Defense, The National Cancer Institute and other organizations. She is a co-director of the National Community Outreach Training Core for the National Breast Cancer and The Environment Research Centers. As a researcher she developed a non-surgical cosmetic tool for breast cancer survivors. She is currently involved with Harvard University and The National Institute of Environmental Health Sciences in several research projects focused on light at night and disruption of the circadian rhythm, sleep/wake cycle.

Eve Sanchez Silver
